

Week 3-4 (March 16-27)

GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
1. COMPLETE CRUD FEATURES 2. FINALIZE ALL FEATURE FUNCTIONALITIES 3. REDUCE ERRORS 4. ACHIEVE 100% PROJECT COMPLETION	1 Additional debugging results 2 Feedback for program (03.01) 3 incomplete CRUD functionalities	1. Continued Debugging and testing 2. More tweaks and improvement of overall program 3. Program reached an approximate 80% functionality
STRENGTH		
We, as a group, can work under pressure and thankfully can still produce results. We are persistent in debugging and improving our program. Lastly, we continuously progress despite time constraints, misunderstandings, and challenges between members.		
AREAS FOR DEVELOPMENT		
Ongoing delays and time constraints Lack of cooperation from some members during critical times		
STRATEGY FOR SUCCESS		
Continued development and debugging Focused on completing major system requirements (CRUD) Maintained progress despite team and time challenges		

Computer Science 2 Project
Group Progress Report
4TH Quarter

Team Members:	MARQUEZ
	DUROY
	COSTO
	MORGA

Week 1-2 (March 2-13)

GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
1. Continue debugging and fixing the core features. 2. Enhance UI and program display 3. Prepare the implementation of CRUD requirements	1. Initial debugging results and identified errors in the program 2. Issues found in task overview and grade calculator feature 3. Observations in early testing performance.	1. Improvements made to taskoverview and grade calculator feature 2. Started debugging and testing the program 3. Initial tweaks were made in the code for better performance.

STRENGTH

We, as a group, can work under pressure and thankfully can still produce results. We are persistent in debugging and improving our program. Lastly, we continuously progress despite time constraints, misunderstandings, and challenges between members.

AREAS FOR DEVELOPMENT

Delayed responses causing the team to fall behind schedule
Limited time available for development (time constraints)
Some members were not cooperative or unavailable during critical work periods

STRATEGY FOR SUCCESS

Continued debugging despite delays
Focused on improving key features (grade calculator and task overview)
Ongoing adjustments to meet CRUD requirements
Worked under pressure to maintain progress

Week 5-6 (March 30, 31)

GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
1. Finalize the rest of the background features to make the program better 2. Finish up GITHUB repository	1. Not much errors compared to last couple of weeks 2. Grade Calculator may be removed from FINAL presentation	1. Fixed multiple bugs in the QUIZ GENERATOR section 2. Removed useless buttons to "clean up" the program

STRENGTH

Considering our group has done so much in the last couple of weeks, our biggest strength since the beginning is our strong willpower - Despite misunderstandings and multiple ups and downs, we are proud to say that we are 90% done with our program.

AREAS FOR DEVELOPMENT

In future projects with other groups, I hope the habit of 'ghosting' the groupchat and only doing things once higher ups are dragged in will change, and I hope other groups in future works won't have to be burdened by that.

STRATEGY FOR SUCCESS

Our strategy for success is just stay optimistic - Even if it wasn't as good as we expected, we will take it as a learning opportunity and be proud of our output. We will continue to motivate ourselves till the end until the end of the final presentation.

Week 7 (April 6-7)

GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
1. Do the final debugging of the program 2. Double take on the features to make sure there will be no more errors during final presentation.	No more data has been collected	We have accomplished everything we needed to achieve full project completion.

STRENGTH

After everything that we have accomplished during this quarter, we are proud to say that until now, Willpower was our greatest strength to achieve a complete project.

AREAS FOR DEVELOPMENT

No areas for development in terms of project. However, there are still some noticable areas between the group members to improve on, especially timeliness and coordination.

STRATEGY FOR SUCCESS

Our strategy for success in the final days of our project is to just stay optimistic as always. We admit that our program doesn't really show what we were imagining in the past quarters, however we continued to motivate ourselves to complete everything until it seems like there is nothing to complete anymore as of the 'completion' of the program.
