WHAT IS FOCUS FLOW?

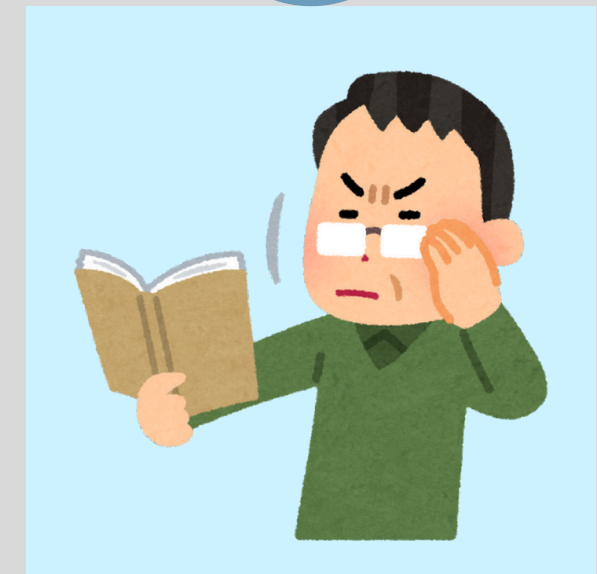

Focus Flow is a productivity-based system, specifically made for students, that uses a priority-based algorithm to help users manage tasks easily, ensuring seamless, automated workflow amongst users and maximize efficiency

PROBLEM STATEMENT

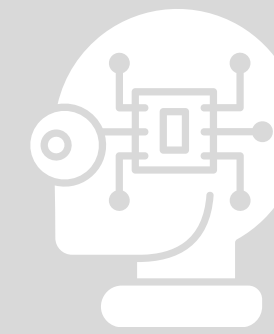

Students nowadays have a hard time keeping track of their deadlines, tasks, and grades despite platforms such as google drive, sheets, or google chats being available.

- **Scattered systems**
- **Losing track of time**
- **Overwhelming platforms**

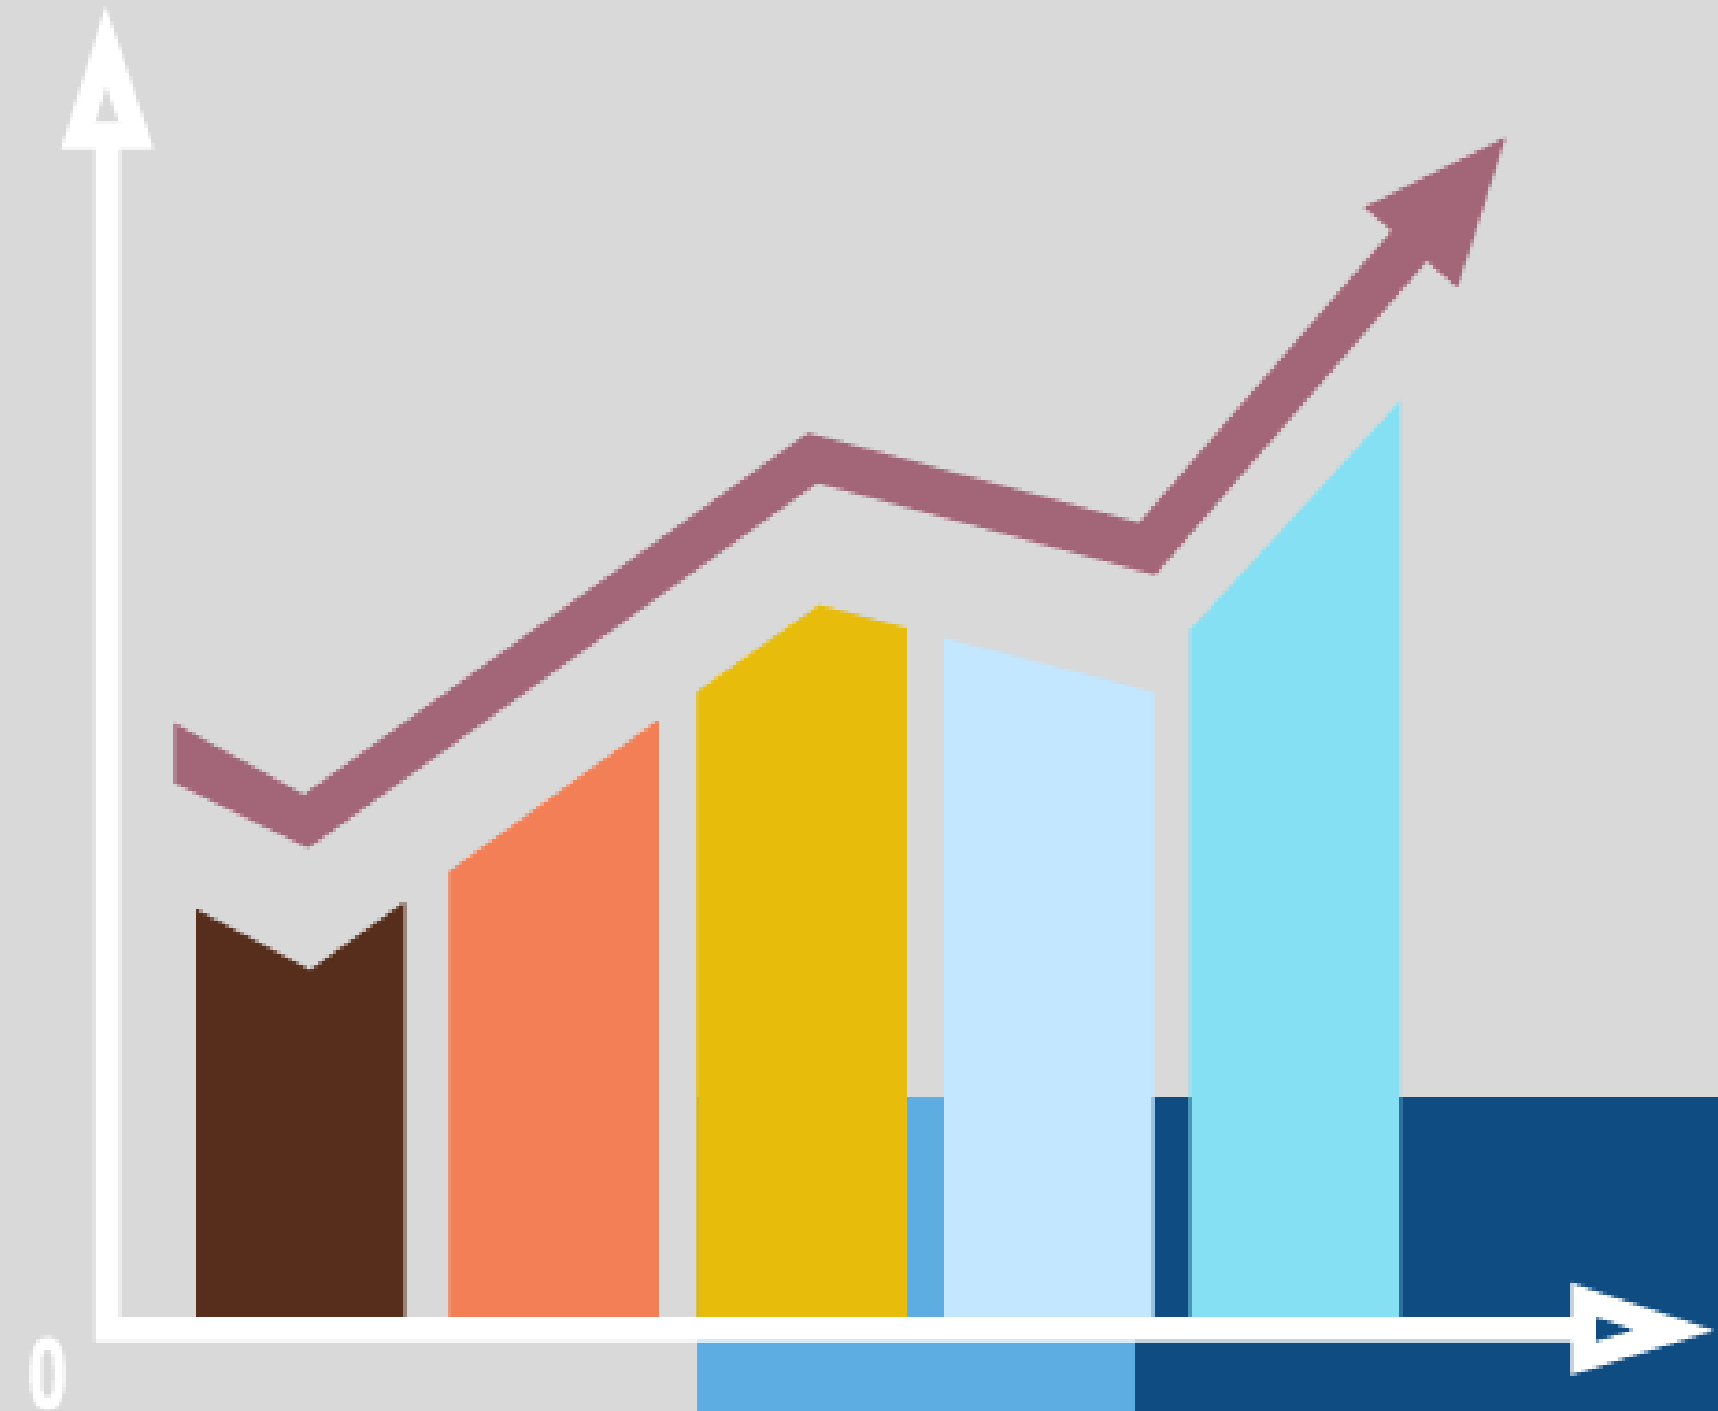

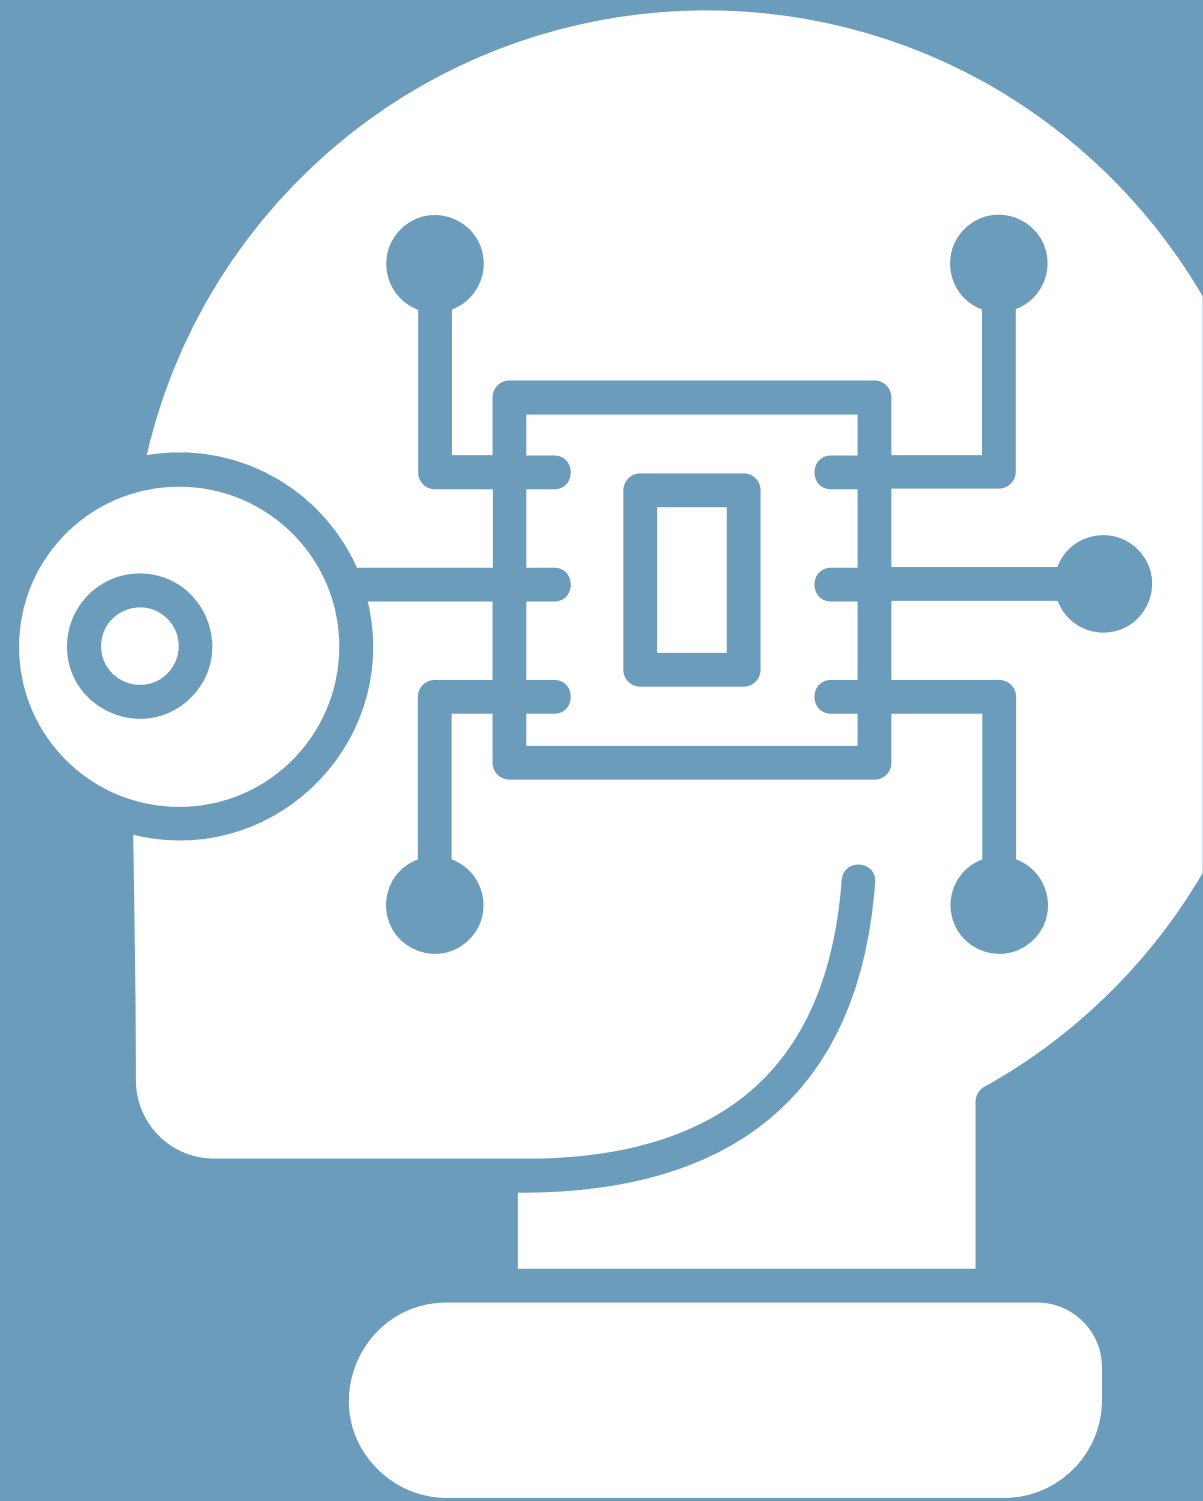

STATISTICS:

- **PROCRASTINATION** - Students from ages 15-18 admit to 'procrastinating' tasks.
- **PROCRASTINATION** - Out of the 650 students that have been studied, 86% of them 'practice' procrastinating
- **STUDY ON SCATTERED PLATFORMS LINKED TO ACADEMIC STRESS** - 50% of students have reported 'stress' due to too much workload.

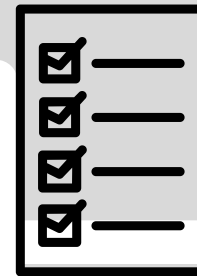

**Focus
Flow**

Our Solution? FocusFlow!

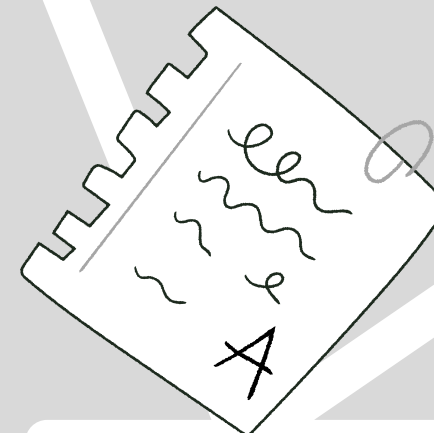

FocusFlow is an individualized platform; Where in one app, students can:

CATEGORIZE Tasks by
subject/priority

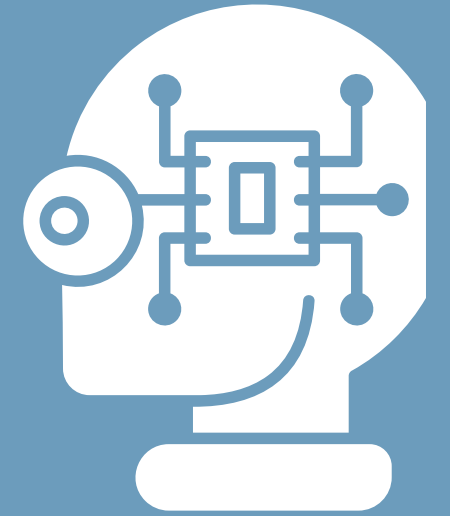

LIST AND PRIORITIZE DEADLINES

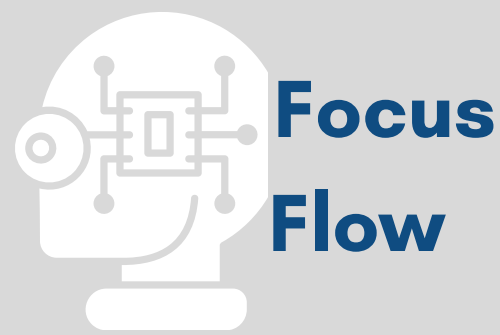

GENERATE Practice Quizzess

OUR OBJECTIVES:

- 1. Develop an algorithm integrating both python and java, that allows students to view & track deadlines all in one place.**
- 3. Implement a Smart Task Manager with 'auto categorization' to ensure manageable workload**
- 4. Create a 'user-friendly' platform that is both effective, yet simple and minimalistic**

How Will It Work?

Main Features:

1. CENTRALIZED DASHBOARD

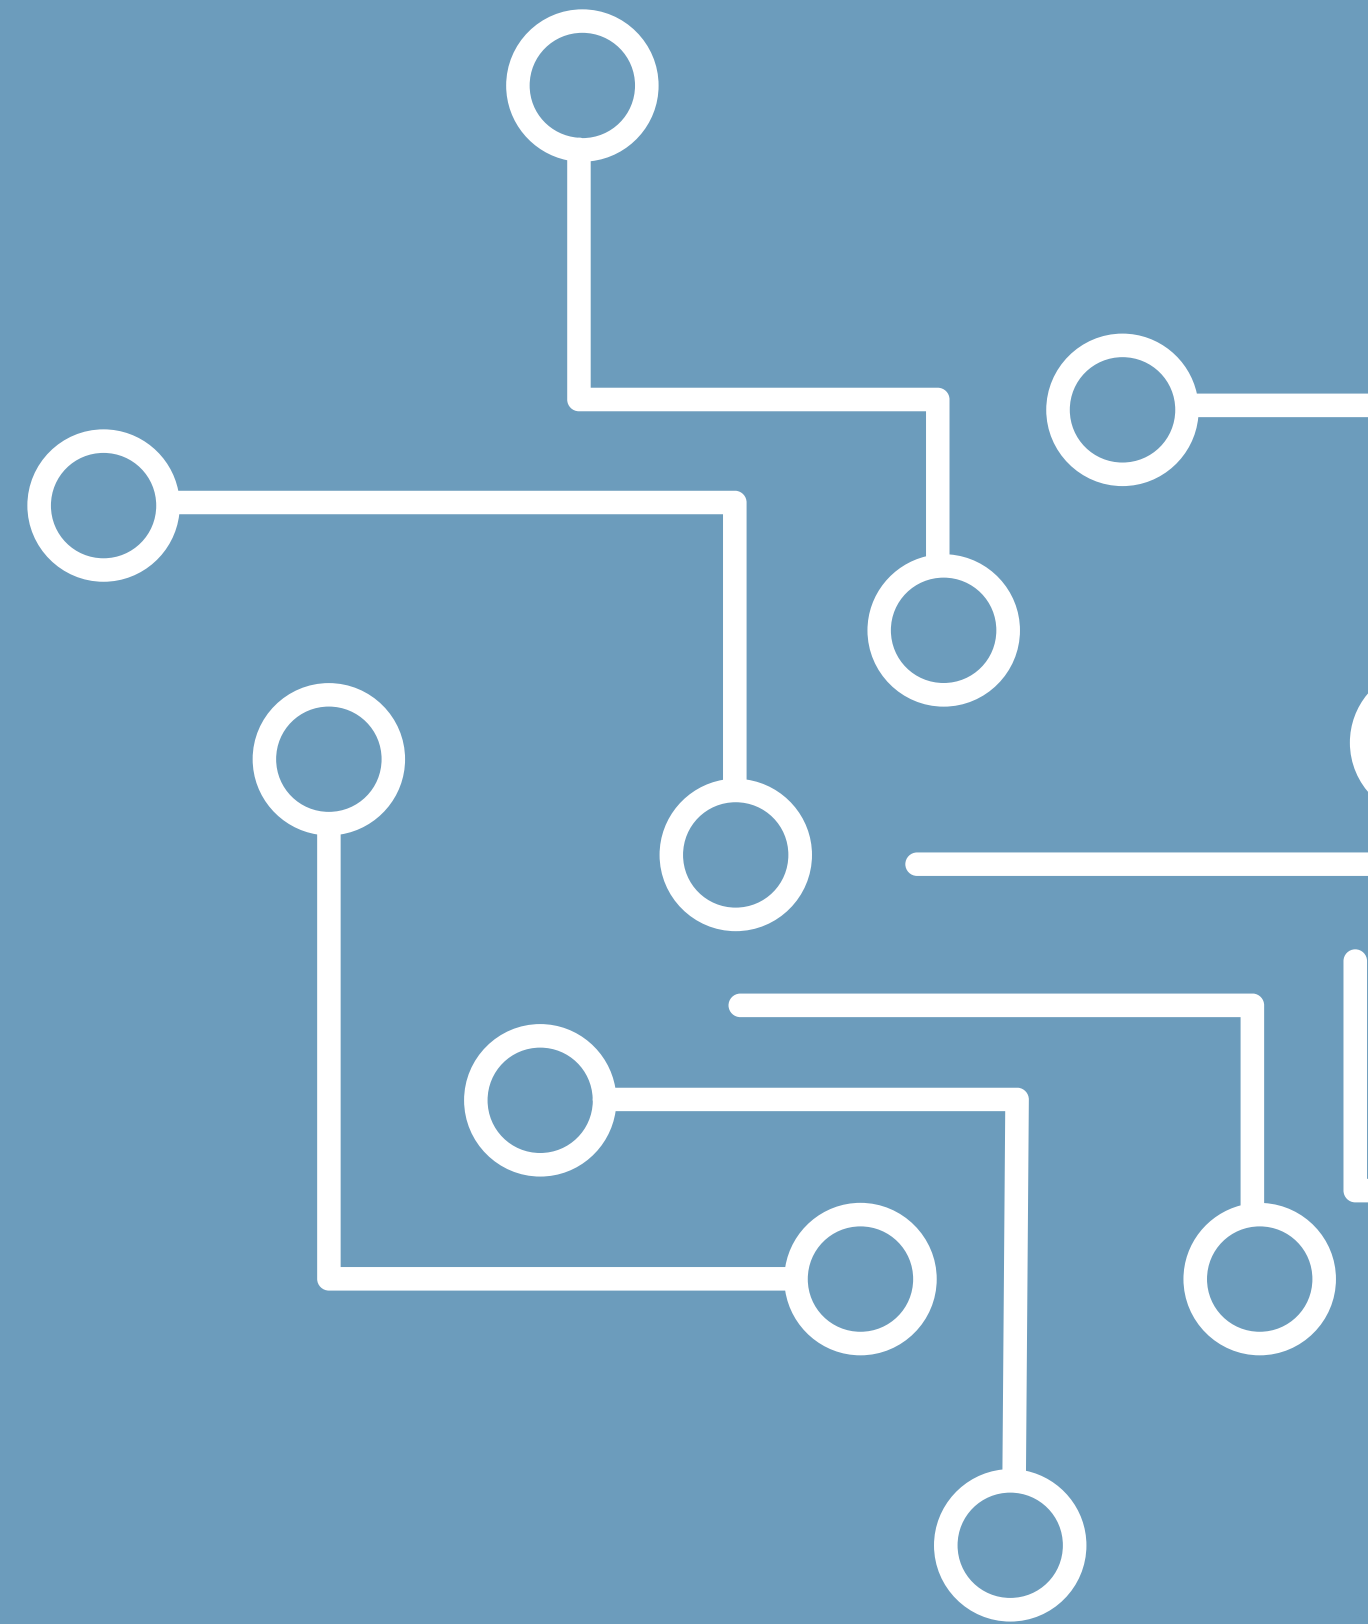

- displays tasks and upcoming deadlines

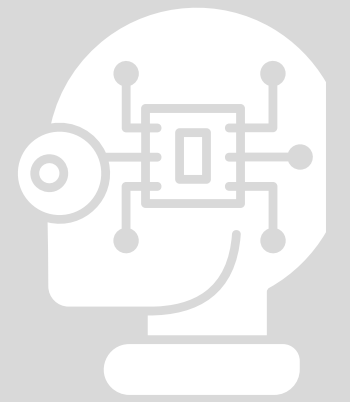

2. SMART TASK MANAGER

- Quick add and auto-categorization

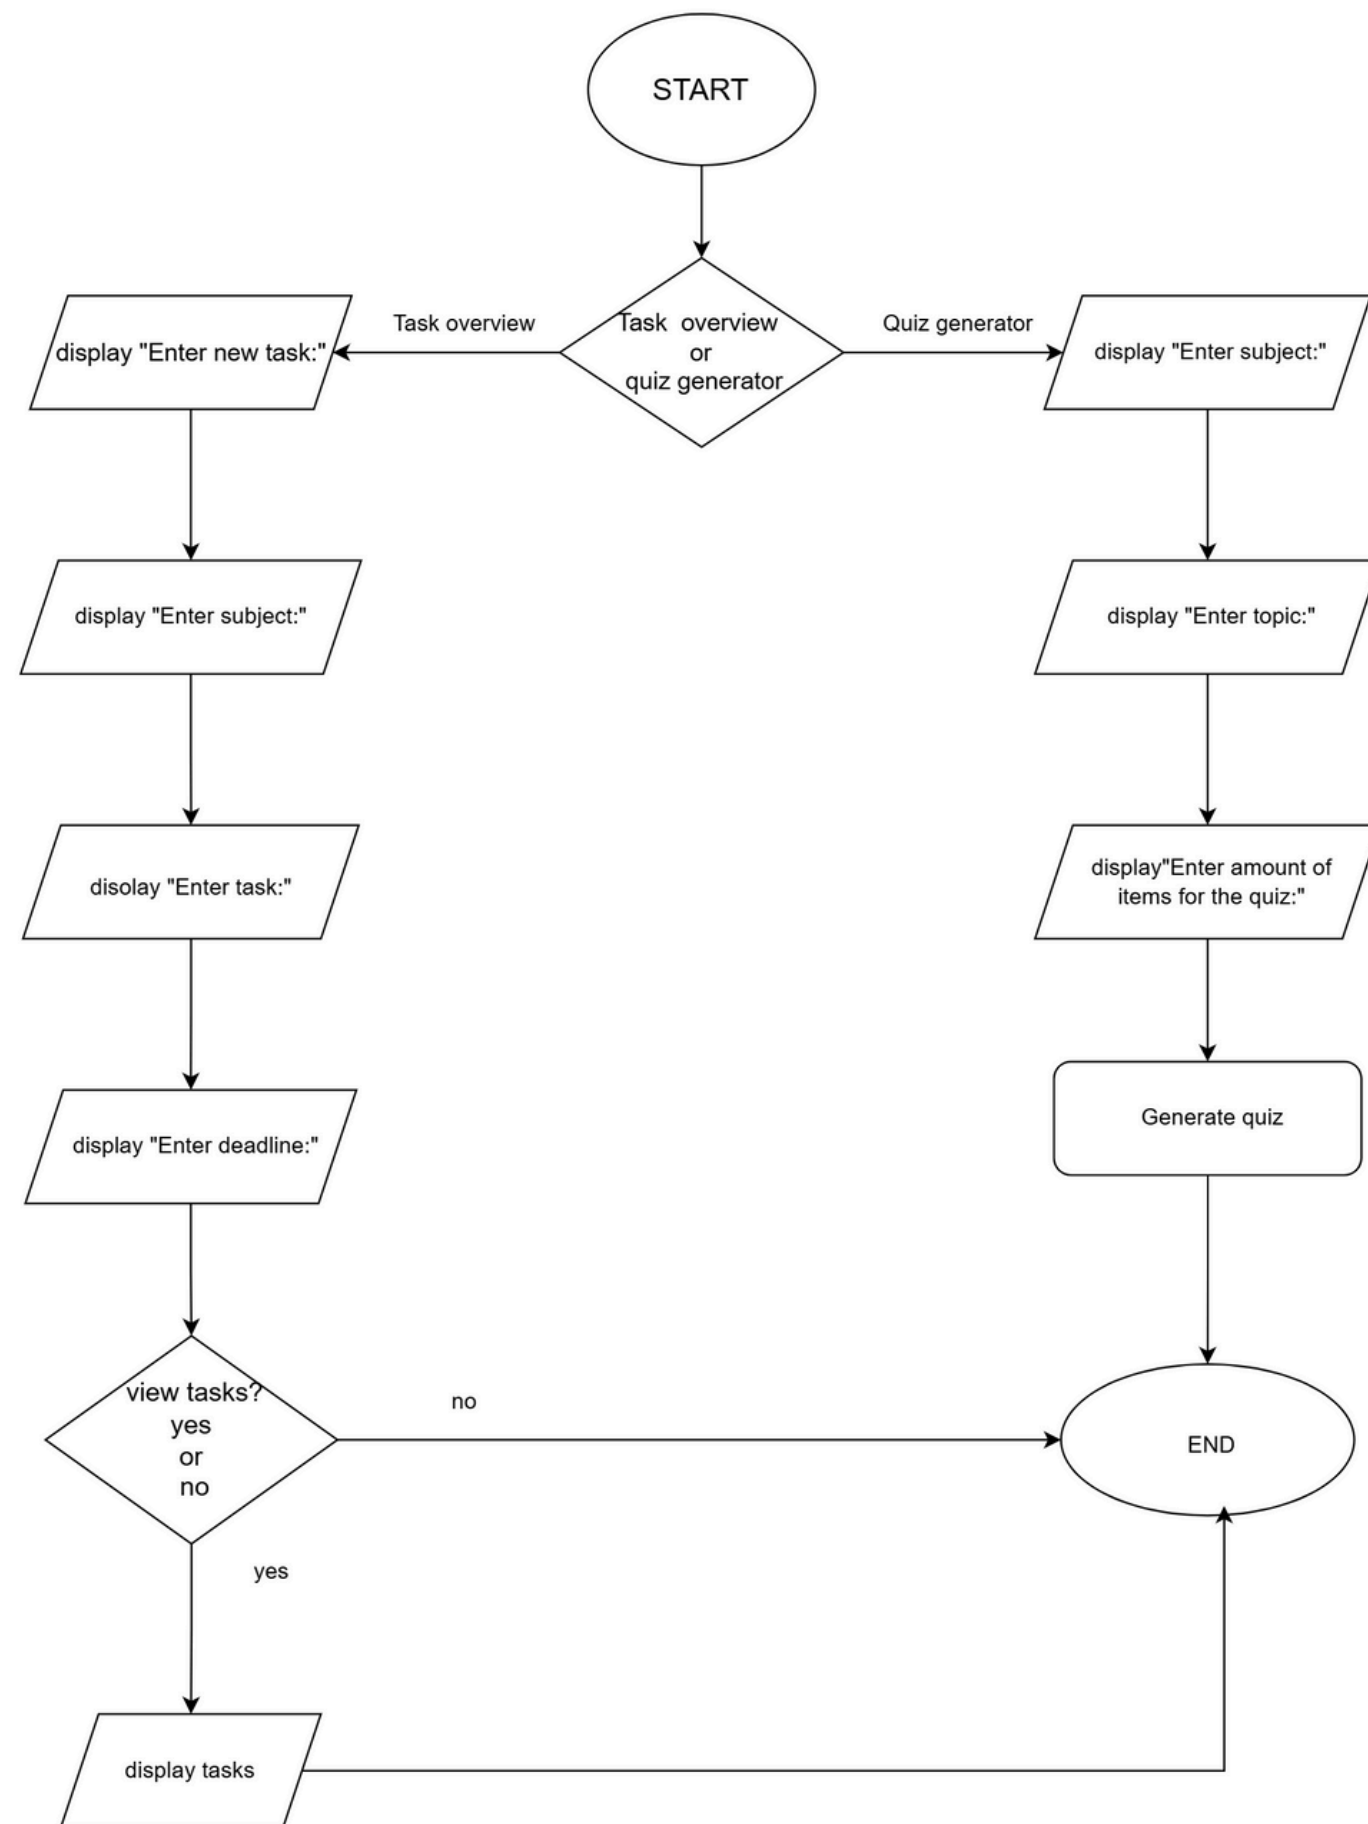

3. QUIZ GENERATOR

- generates quizzes from JSON depending on the subject inputted. (optional)
