

Study Buddy

A productivity-based app made for students!

PROBLEM STATEMENT:

Students nowadays have a hard time keeping track of their deadlines, tasks, and grades despite platforms such as google drive, sheets, or google chats being available. Problems faced are the following:

- a. **Scattered Systems** – existing systems are designed for general productivity (e.g., daily activities, work activities etc.) rather than for academic needs, making it difficult for efficient use.
- b. **Overwhelming tabs** – Even with integrated suits, students still need to keep switching between different tabs, which then requires users to manage another set of workloads.
- c. **Loosing track of time**

As a result, students may find it challenging to keep track of what needs to be done and how they're doing, affecting their overall performance and well-being.

The solution? **Study Buddy!**

Study Buddy is an individualized platform that was created for students. In one app, users can:

- A) List and Prioritize activities & upcoming deadlines
- B) Track their academic performance through a built-in grade calculator
- C) Generate quizzes

All in one sitting!

OUR OBJECTIVES:

1. Develop an app that integrates both python and java; allows students to view deadlines, monitor grades, and create quizzes all in a single space.
2. Implement a 'Smart Task Manager' with auto categorization to ensure manageable workload.
3. Create a 'user-friendly' platform that is both effective, yet simple and minimalistic

PLANNED FEATURES:

1. Centralized Dashboard

- Displays all upcoming deadlines, ongoing tasks, and completed work in a clean, unified interface.
-

2. Smart Task Manager

- Quick Add: Create tasks in seconds with one tap.
- Auto-Categorization: Sorts tasks, notes, and grade by subject, project, or priority level automatically.

3. Grade Tracker

- Calculates the tentative grade based on given scores

4. Quiz Generator

- Randomized questions depending on what subject and topic you choose
- Keeps a simple multiple choice format.

BENEFITS OF USING STUDY FLOW:

1. Promote Time Management: To encourage consistent task tracking and prioritization through smart scheduling and reminder features.

2. Simplify Academic Organization: To eliminate the need for multiple apps by integrating essential tools for task management into one unified system. #
